

AIR FORCE CIVIL ENGINEER SUPPORT AGENCY

The Air Force Contract Augmentation Program (AFCAP) is a rapid response contract tool to help you get the capabilities you need from the commercial sector. AFCAP is a force multiplier in meeting urgent mission requirements.

Air Force Contract Augmentation Program (AFCAP)

AFCAP is a rapid response contingency contract tool for use by U.S. Government entities needing urgent assistance.

AFCAP utilizes pre-qualified vendors accessible via cost reimbursement task orders and provides cost effective, highly responsive solutions to meet urgent needs. Depending on urgency, requirements or task, contracts can be structured to firm-fixed-price, cost-plus fixed fee or cost-plus award fee task orders.

WHAT AFCAP CAN PROVIDE

AFCAP provides the full scope of Civil Engineer capabilities and logistics including:

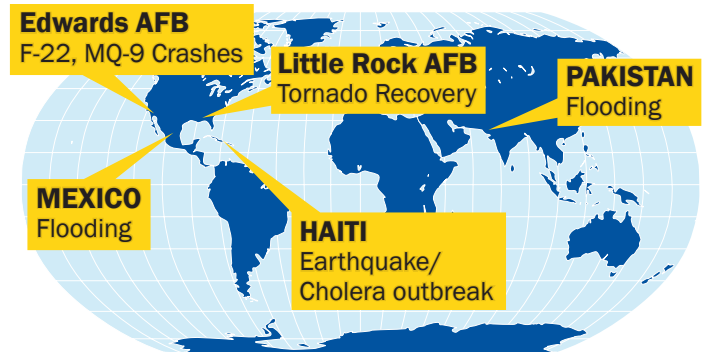

- Professional engineering services and infrastructure support including architectural and engineering design, maintenance, repair, and construction
- Emergency management, structural fire protection, facility hardening, dispersal, obstacles, redundancy measures, reconstitution of assets, and non-environmental site restoration
- Environmental management services including permits, and hazardous materials/waste management and disposal

Explosive ordnance disposal and flightline crash fire rescue operations are excluded.

AFCAP also provides a complete range of Services capabilities and logistics, including food service, troop support, lodging, laundry, fitness, and recreation. Exceptions are mortuary affairs and field exchange.

**In FY11, AFCAP
awarded \$399.3M in
contingency support,
disaster recovery, and
State Department
requirements.**
